

## Want to make a better basket or drip tray?

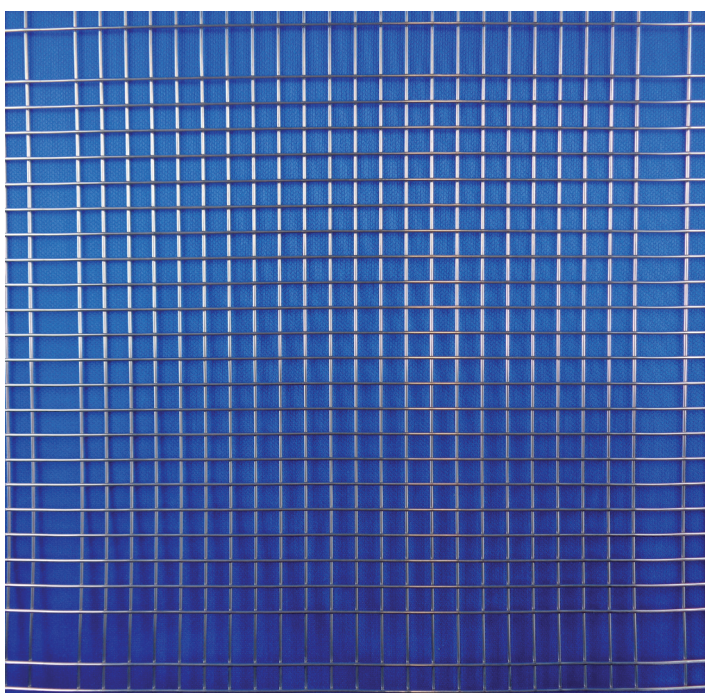

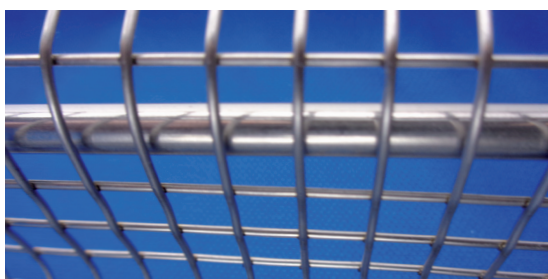

**Our welded mesh can make the job easier and save manufacturing cost.**

Your design determines what wires need to be dropped.

- Create gaps, exactly where the frame will be welded.
- Easy frame to mesh alignment.
- Less cutting of edge wires and grinding.
- Less welding errors frame to mesh.
- Overall better quality and reduced safety concerns for your customers.

***Your end product will not only look better.***

***It will perform better!***

***Let us work with you on your mesh design!***

Mesh Specifications	
Material	Steel, Stainless Steel and Alloy steel
Mesh	3–50 mm clear mesh opening
Wire	0,4–2 mm / .016" - .080" depending on opening
Size	Piece sizes and gaps can be designed
